QWIK-FENCE®
## PALLET RACK BACKING

LIGHTWEIGHT

The frameless design makes Qwik-Fence® Pallet Rack Backing lightweight and easy to install.

WELDED MESH

Welded mesh provides a safer working environment than netting.

STACKABLE

Customize to your needs. Stack panel on panel to safeguard your highest rack.

IN STOCK

A large stock of the most common bay widths are ready to ship when you need it.

	122.5"	146.5"	

*146.5" width not compatible with 60" panel height

MITIGATE FALLING OBJECTS INCIDENTS

According to the Bureau of Labor Statistics, more than 42,400 "struck by falling object" OSHA recordable incidents in 2022. That's over 116 injuries per day, or one injury caused by a falling object every 10 minutes.

OSHA publishes the list to alert employers about these commonly cited standards so they can take steps to find and fix recognized hazards as cited at osha.gov/top10citedstandards

Adjustable extension kits allows extentions of panels past uprights.

The Qwik-Fence® Pallet Rack Backing System is the perfect solution for securing pallet racks and bulk racks. This all-steel system provides fall-down protection for your company's most important asset—people. The open mesh design allows for quick visual inspection and allows waterflow from sprinkler systems.

Multiple assembly options allows the Qwik-Fence® system to be mounted flush, or if preferred, mounted with a selection of stand-off brackets. Visually, the galvanized finish will keep your system looking new for years to come.

Offset brackets available in different distances.
