

VERSA GUARD™ MACHINE GUARDING

MADE IN THE USA

THE MACHINE GUARDING SYSTEM THAT BLENDS FUNCTION, FLEXIBILITY AND COST-FRIENDLINESS

▶ **STURDY SYSTEM**

With 90 degree bends at the top and bottom of all panels, the rigidity of this system is unparalleled compared with other frameless systems.

▶ **UNSURPASSED ADJUSTABILITY**

Panels can easily be adapted before delivery or on-site, and it is easy to make cut-outs without any need for welding.

▶ **QUICK & EASY ASSEMBLY**

All mounting hardware and floor anchors are included and posts are predrilled for expedited assembly.

▶ **EASILY COMBINED WITH OUR SAF-T-FENCE® SYSTEM**

Can be used where risk of impact is low and seamlessly blended to our Saf-T-Fence® system in higher-risk sections.

Our Frameless Machine Guarding system is an attractive guarding solution that provides great visibility around any machine. Welded at each intersection in its tight 1 ¼" x 2 ½" grid pattern, this system can be installed as close to 8" to hazard (per ISO 13857). This allows you to install much closer than the conventional 2" x 2" grid pattern, which cannot be installed closer than 33 ½". With this extra 25 ½" in distance, you can more efficiently utilize your floor space.

With simple mounting clips, this frameless system is easily reconfigurable, flexible and installs 25% faster than substitutes by employing fewer parts and utilizing self-tapping screws.
